

AIM Solder is a leading global manufacturer of assembly materials for the electronics industry with manufacturing, distribution and support facilities located throughout the world. AIM is strongly committed to innovative research and development of product and process improvement as well as providing customers with superior technical support, service and training.

AIM recognizes the impact that business activity has on the environment and its natural resources. Corporate environmental sustainability is an integral part of the company's business practices. AIM is committed to continuous improvement and adheres to the following policies:

- Comply with environmental laws and regulations relating to its activities, products and services and other requirements;
- Manufacture environmentally friendly products;
- Prevent and control pollution caused by its activities, paying particular attention to waste management in order to minimize their negative impacts at the source and promoting reduction, reuse and recycling;
- Use resources efficiently and optimally;
- Sensitize its employees, business partners and suppliers of the need for responsible management of their activities, products and services.

AIM is also compliant with the Electronic Industry Citizenship Coalition® (EICC®) Code of Conduct which establishes standards to ensure that working conditions in the electronics industry supply chain are safe, that workers are treated with respect and dignity, and that business operations are environmentally responsible and conducted ethically.

AIM's Environmental Sustainability Policy is communicated to all persons working on behalf of the company and available to the public.
